## Fruits Growing Guide – Eco Hope Co. Ltd

### 1. Introduction

- **High-Value Crops:** Fruit crops have high market demand and offer excellent returns.
- **Eco Hope's Expertise:** We provide support for growing tropical fruits like mango, avocado, and passion fruit.

### 2. Fruit Types

- **Common Fruits:** Mango, pineapple, passionfruit, avocado.
- **Soil Type:** Choose well-drained loamy soils with a pH of 6.0 to 7.5.

### 3. Site & Soil Preparation

- **Loamy Soils:** Avoid waterlogged soils for better root development.
- **Deep Pits:** Dig deep holes (60x60x60 cm) for each tree and enrich with compost.

### 4. Planting

- **Spacing:** Space mango trees 10 meters apart; pineapples 30 cm apart; passionfruit vines 2-3 meters apart.
- **Grafted Seedlings:** Use grafted seedlings for uniformity and disease resistance.

### 5. Irrigation

- **Drip Irrigation:** Apply drip irrigation during dry seasons to keep the soil moist.

### 6. Pest & Disease Management

- **Pests:** Fruit flies, weevils, scale insects.
- **Diseases:** Anthracnose and fungal infections.
- **Management:** Use organic pest control methods and proper pruning techniques.

## **7. Fertilization**

- **NPK Fertilizer:** Apply nitrogen-based fertilizers during the growing season.

## **8. Harvesting**

- **Mangoes & Avocados:** Harvest when fruit reaches full size and color.
- **Passionfruit:** Pick when the skin turns yellow.

## **9. Contact Information**

- For expert guidance, contact Eco Hope's fruit specialists.
